

FLAT BENCH

D

Commercial grade double-stitched vinyl cover and high resilient foam cushions are UV and sweat resistant and hold their shape under extreme use.

E

The 12" x 48" pad and the overall bench height of 17-1/2" meet competition regulations.

S

Formed brackets keep the bench resting on four points and eliminate end caps that are prone to getting kicked out.

I

Zinc plated 1/2" Grade 5 socket head cap screws, vibration resistant nyloc nuts, and oversized 1.25" OD washers that prevent tube deformation.

G

Structural grade 3" x 3" 11 gauge (3mm) tubing screws strength and durability.

N

5 mil thick Storm grey wrinkle textured powder-coat paint holds up to scuffs for long lasting protection.

ABOUT THE XFB

The X-Series XFB is a no-nonsense indestructible bench. The bench is over-engineered and over-built, but we aren't ashamed to admit it. Created using 3" x 3" 11 gauge structural tubing with a fully welded frame bolted to the base legs through 1/4" thick plates using 1/2" socket head cap screws with oversized washers and vibration resistant nuts, the bench could take on anything. Even the minor things common to such benches, such as end caps on the base legs that can never stay in were addressed. By capping the ends with formed brackets, not only are there no end caps, the tubes are also suspended so that the bench rests stable on four points instead of rocking on tubes on uneven floors. The bench is designed to meet competition regulations but built to exceed all standards.
