

# CURVE TRAINER

## ENDLESS POSSIBILITIES

**BURN UP TO 30% MORE CALORIES - ZERO ELECTRICITY REQUIRED**

The Curve Trainer is a completely manual treadmill allowing a user to accelerate and decelerate at their own desired pace without the need to push a button. The curved design of the treadmill requires a user to practice proper gait and running mechanics encouraging better posture while activating posterior chain muscles.

With unlimited mobility the Curve Trainer allows the user to take full control of their workout allowing for easy transitions between various speeds and tempo runs. Not in the mood to run? The Curve Trainer also makes for a great walking platform while still providing all the direct benefits of running. Burn up to 30% more calories on this completely self-powered machine.

## | CURVE SERIES

### CURVE TRAINER

This compact non-motorized treadmill is designed for walkers and joggers who are looking to build endurance and increase stamina. Train comfortably and for longer periods of time while reinforcing proper gait mechanics and posture.

### CURVE

From beginners to serious athletes the Curve is the universal cardio solution. Users can workout at any speed with full control of the treadmill, making the Curve the ideal sport specific high intensity and small group training tool.

### CURVE XL

Popular among Professional Sports teams and military training facilities the Curve XL features all the innovations and benefits of the standard Curve in an extra-large platform for the larger-lengthier athletes.

### ECOMILL

The EcoMill does not require electricity but in fact transfers power utilizing the user's energy output. The display board is powered by a built in generator that is charged when a user walks or runs. Via the USB outlet, a user can also charge a mobile device. The EcoMill also features an electromagnetic braking system to effectively control and maintain a consistent speed throughout. A user has the ability to set initial maximum speed at a 0.1 mph increment to prevent over-acceleration.
