- Exclusively sold on TRXtraining.com

TRX APP

The new TRX App offers the closest thing possible to training with a personal coach anywhere, anytime. Real-time, in-ear cueing captures the nuances and passion with form checks and “atta boy + girl” encouragement in exclusive workouts.

Establishing a user’s personal benchmarks through preferences, history, and biometric tracking, the TRX App guides them to achieve their individual goals. It makes sense of wearable data and makes that data actionable by recommending the next progression. The TRX App enables users to build an exercise calendar by tagging workouts for specific days/times, creating a true exercise regimen and taking users where they want to go on their fitness journey.
